2.16.1	Select option “Create patient XML”	2-14
2.16.2	Create HTML	2-15

1.0 GENERAL INFORMATION.

1.1 System Overview.

The Hospital Management for rare diseases app is an application that allows you to assign a hospital for a patient who needs a treatment not accessible in most hospitals. The information available includes a list of hospitals and their respective machines and doctors, as well as information on the sorting medics, all already inside the database.

The goal is to provide people with uncommon diseases a fast and secure way to find a hospital that can provide the treatment that they need.

1.2 Authorized Use Permission.

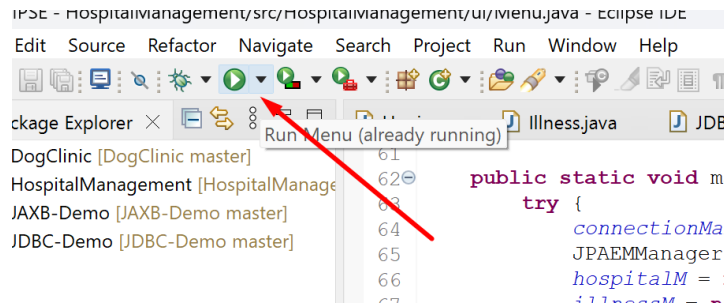

The app is available only to sorting medics. You need a username and password to view or modify the data. That way only sorting medics can login to add or update the necessary information.

2.0 SYSTEM FEATURES.

2.1 Login.

By logging in you will be allowed to access the main menu where a list of options will show up to do various tasks.

- 1) Click on Run Menu.

The login screen displays as shown below.

- 2) Type the **Username** and **Password**. (This is an example, there's 3 options by default)
Options: johnny / hobbit73; ade / spiderman32; agnessy / theLordofRings47.

```
Type the user name:
johnny
Type the password:
hobbit73
```

2.1.1 Successful Login.

The main menu is displayed.

```
|Choose an option, please:
-1. Register a new Patient
-2. Select a patient data
-3. Select doctor data
-4. Show hospitals
-5. Create XMLs
-0. Exit
```

2.1.2 Invalid Username / Password.

If user enters invalid username or password, then the following error message will display:

“Incorrect username / password.”

```
      Type the user name:
```

```
      Type the password:
```

```
|      INCORRECT USERNAME / PASSWORD
```

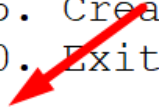

After that it will ask you again for a username and password.

2.2 Register a new patient.

2.2.1 Select option “Register a new patient.”

To select the first option, type a 1.

```
Choose an option, please:
-1. Register a new Patient

Select what do you want to turn into an XML.

```
What do you want to turn into an XML? :
1. Hospital
2. Illness
3. Machine
0. Back to principal menu
1
```

Note: In this case we will be creating a Hospital XML.

After that a list of hospitals will show up, select the one you want to turn into an XML by choosing their id.

```
Which hospital do you want to create an XML out of?

[
  id: 1|
  name: Hospital Universitario Fundacion Jimenez Diaz
  location: Av. Reyes Catolicos 2, Madrid
,
  id: 2
  name: Centro Medico Teknon
  location: Calle Vilana 12, Barcelona
,
  id: 3
  name: HM Universitario Sanchinarro
  location: Calle Ona 10, Madrid
,
  id: 4
  name: Hospital Universitari i Politecnic la Fe
  location: Av. de Fernando Abril Martorell 106, Valencia
,
  id: 5
  name: Hospital Infantil Universitario Nino Jesus
  location: Av. Menendez Pelayo 65, Madrid
]

Choose an id:
1
```

This same process will happen when choosing to create an XML of Machine and Illness. After choosing the id, the XML will be saved in the xml folder of the project.

2.6.3 Create an HTML.

An option will show up after having selected the hospital in this case. If you also want to create an HTML after creating the XML type “Y” for yes, if not type a “N” for no.

```
Do you want to create and HTML? Y/N
Y
```

When choosing “Y”, the HTML link will be created in the xml folder of the project. To open the HTML, you’ll only have to click on it and the page will be opened in your browser.

2.7 Update data of the doctor.

To update the data of the doctor you must have selected a doctor first.

2.7.1 Select option “Update data.”

To select, type option 1.

```
What do you want to do with the doctor?:
1. Update data
2. Show data
3. Delete doctor
4. Create doctor XML
0. Back to principal menu
1
```

2.7.2 Input new data.

When asked for that field you can either leave it as it was by pressing enter or input the new information.

```
Type the new data, or press enter to keep actual data
Name (Adele):

Surname (Brown):

Salary (55000):
```

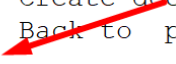

2.8 Show data of the doctor.

To update the data of the doctor you must have selected a doctor first.
